

Enanta Pharmaceuticals to Host Conference Call on November 21 at 4:30 p.m. ET to Discuss Financial Results for its Fiscal Fourth Quarter and Year Ended September 30, 2016

November 1, 2016

WATERTOWN, Mass.--(BUSINESS WIRE)--Nov. 1, 2016-- Enanta Pharmaceuticals, Inc., (NASDAQ: ENTA), a research and development-focused biotechnology company dedicated to creating small molecule drugs for viral infections and liver diseases, today announced that it plans to report its financial results for its fiscal fourth quarter and year ended September 30, 2016 after the U.S. markets close on November 21, 2016. Enanta management will host a conference call at 4:30 p.m. ET to discuss these results and provide an update on Enanta's research and development pipeline.

Conference Call and Webcast Information

To participate in the live conference call, please dial (855) 840-0595 in the U.S. or (518) 444-4814 for international callers. A replay of the conference call will be available starting at approximately 7:30 p.m. Eastern time on November 21, 2016, through 11:59 p.m. Eastern time on November 25, 2016 by dialing (855) 859-2056 from the U.S. or (404) 537-3406 for international callers. The passcode for both the live call and the replay is 9163079. A live audio webcast of the call and replay can be accessed by visiting the "Calendar of Events" section on the "Investors" page of Enanta's website at www.enanta.com.

About Enanta

Enanta Pharmaceuticals is a research and development-focused biotechnology company that uses its robust chemistry-driven approach and drug discovery capabilities to create small molecule drugs for viral infections and liver diseases. Enanta's research and development efforts are currently focused on four disease targets: Hepatitis C Virus (HCV), Hepatitis B Virus (HBV), Non-alcoholic Steatohepatitis (NASH) and Respiratory Syncytial Virus (RSV).

Enanta has discovered novel protease inhibitors and NS5A inhibitors that are members of the direct-acting-antiviral (DAA) inhibitor classes designed for use against the hepatitis C virus (HCV). Enanta's protease inhibitors, developed through its collaboration with AbbVie, include paritaprevir, which is contained in AbbVie's marketed DAA regimens for HCV, and glecaprevir (ABT-493), Enanta's second protease inhibitor, which AbbVie is developing in Phase 3 studies in combination with pibrentasvir (ABT-530), AbbVie's NS5A inhibitor. Enanta has also discovered a cyclophilin inhibitor, EDP-494, a novel host-targeting mechanism for HCV, which is now in a clinical proof-of-concept study in HCV patients, and EDP-305, an FXR agonist product candidate for NASH, currently in Phase 1 clinical development. In addition, Enanta has early lead candidates for HBV and RSV in preclinical testing. Please visit www.enanta.com for more information on our programs and pipeline.
